**DETAILED ACTION**

**Allowable Subject Matter**

1. Claim 1-3 are allowed over the cited prior arts.
2. The following is an examiner's statement of reasons for allowance:

Most of the prior arts teach systems that have similar functions as disclosed. For instance, Braun et al. US 6,218,741 B1 teaches about a device that has a rain sensor, control unit, and wiper motor. The rain sensor in Braun et al invention is equipped with a microcontroller that is used to store parameters that have an influence on the sensitivity of the rain sensor. Brief discussion about a multifunction switch that is used for a wiper is discussed in Jaworski et al 6,069,461. Similar systems that contain the basic components as described here can also be found in many different recent and older inventions.

However, none of the prior arts showed or taught a windshield wiper system that has a method/system used to adjust "the sensitivity of the rain sensors on the basis of a voltage ratio of the automatic signal voltage and battery voltage." Thus, this particular teaching has been found to be a unique improvement of today's vehicle windshield wiper system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

**Conclusion**

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Please refer to the attached PTO 892 form.
